SUMMARY

Full-stack developer with three years of experience in web application development, front-end skills in React.js, TypeScript, and Redux, and back-end expertise using Java, Node.js, and REST APIs. Proficient in AWS Cloud Services (S3, EMR, EC2, Lambda, Glue, VPC), MongoDB, and SQL. Experienced in Docker, CI/CD tools (Jenkins, GitHub Actions), and distributed systems.

WORK EXPERIENCE

Full-Stack SDET, Copart, Inc., Dallas, United States

Jan 2025 - Present

Automobile Online Auction Platform, Tech Stack: Java, React, SQL, Cucumber, TestNG, CAP, Kafka, Git, Maven, J2K

- Contributing to the development of automated test suites using Java and Cucumber to validate Kafka-based microservices, focusing on message integrity and system reliability.
- Assisting in creating containerized test environments with Kubernetes and Docker to optimize testing for distributed applications.
- Writing and validating test cases to ensure SQL queries and database transactions operate accurately within the system.

Software Specialist (Part-Time), The George Washington University, Washington, D.C., United States

Feb 2023 - Dec 2024

Smart Campus User Interface, Tech Stack: React, C#, Cloud Infrastructure, Scalable Architecture, API Integration

- Developed and deployed interactive touch panels across over 800 educational facilities using React, improving system responsiveness and enhancing user interaction.
- Configured real-time camera control on touch panels, enhancing accessibility and improving learning experiences by 20%.
- Collaborated with backend teams to integrate cloud-based systems using C#, reducing system downtime by 15%.
- Worked on the architecture design to deployment of scalable, highly available technology solutions, contributing to a 30% increase in system uptime under demanding conditions and a 40% boost in customer satisfaction ratings.
- Used Redux for efficient state management in touch panels, improving data handling and reducing debugging time by 25%.
- Integrated scalable AWS Cloud Services with real-time backend systems, optimizing performance and reducing latency.

Software Engineer, Larsen & Toubro Infotech, Chennai, India

Aug 2021 - Dec 2022

Banking KYC Application, Tech Stack: React, Java, Spring, Maven, MySQL, CI/CD, Agile, API, Security Compliance

- Built a customer onboarding module using React, Java, and Spring that cut onboarding time by 25% and refined system efficiency.
- Enhanced a transaction monitoring system, increasing security alert accuracy by 30% and detecting issues faster using MySQL.
- Streamlined a compliance reporting module by integrating API-based workflows, reducing report creation time by 30% and enhancing efficiency by 15%.
- Automated deployment workflows by integrating CI/CD pipelines, accelerating delivery and reducing manual tasks.
- Implemented unit testing with JUnit and Mockito to maintain code quality and reliability.

EDUCATION

The George Washington University - Master, Computer Science - GPA: 3.7/4

Jan 2023 - Dec 2024

Anna University, Chennai, India - Bachelor, Engineering - GPA: 8.3/10

Aug 2017 - Apr 2021

AWARDS

Recipient of the GW Dean's Award, securing a **scholarship over \$30,000** for **exemplary academic performance**.

Oracle Certified Professional JAVA 11 Developer.

PROJECTS

Aircraft Anomaly Detection, Tech Stack: React, Python, Machine Learning (Negative Sampling Neural Network, Enhanced Isolation Forest), XAI (LIME, SHAP, IG, LRP)

- Designed a user-centric dashboard with React for real-time monitoring and analysis of AI model outputs, significantly enhancing decision-making in recognizing aircraft anomalies, while implementing Negative Sampling Neural Network and Enhanced Isolation Forest models (AUC: 82% and 85%) and integrating XAI techniques (LIME, SHAP, IG, LRP) to explain model decisions.

ChatterSphere, Tech Stack: React, Node.js, WebSockets, JWT, MongoDB

- Engineered and deployed a real-time messaging application using React, Node.js, and WebSockets and MongoDB, enabling seamless live communication for users with secure authentication and file-sharing capabilities.
- Resulted in a 25% increase in user engagement through the integration of features like online/offline statuses and auto-scroll for better user experience.

SKILLS

Programming Languages	: Java, Python, Typescript, JavaScript
Front-End Technologies	: React.js, CSS, Bootstrap, HTML5, Redux, Enzyme
Back-End Technologies	: Spring Boot, Node.js, RESTful APIs, Hibernate, JUnit
Database Management	: SQL (MySQL), MongoDB
Dev Tools & Cloud	: Git, Jira, Docker, AWS (S3, EMR, EC2, Lambda, Glue, VPC)
